ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: A VOCAL CONNECTION SYSTEM BETWEEN HUMANS AND ANIMALS

(57) Abstract: A vocal connection system comprises a matrix of sensors (2) adapted to send signal indicative of a status of the animal, in terms of stimuli, feelings, events, actions or behaviours, of the animal, to a microprocessor (3). The microprocessor (3) selects depending upon the signals (4) which are received, a vocal message recorded in memory means (5) associated to the microprocessor (3) and activates a loudspeaker (6) forming part of the system for emitting the vocal message. The system further comprises vocal recognition means (8) which activate stimuli generators (11) as a function of the contents of a vocal message (9) emitted by the human user (7).
